Whaleback	SC 13S15E 6	21 ±20	2,961	2,960 -40 Sabino Canyon

Notes: *Italics* is used for local names not on the maps. The division between the Santa Catalina Mountains and the Rincon Mountains is the lowest saddle between them. Agua Caliente Canyon extends west of here, and Bullock Canyon extends east. On the summits list we have 36 summits, 10 that are probably summits, and 10 that probably are not. We can expect a couple non-summits to move up, and a couple probable summits to drop down if precise surveys are run.
