Notes:

This list includes 9 of the top 10 peaks on the Utah state Prominence list.

Nearly 1/3 of the peaks (7 of 23) are 5,000'+ prominence Ultras.

Only four of the peaks have less than 3,000' prominence.

The lowest prominence listed is Canaan Peak, with 1,840'+.
 This is an improvement on the corresponding Arizona list, which has three peaks of less than 1K prominence.
